

# Package: kwb.infoworks (via r-universe)

September 13, 2024

**Title** Interface from Infoworks to Gerris

**Version** 0.0.0.9000

**Description** This package transforms the output files from InfoWorks (Mass flow data) into a readable format for the Gerris environment. The integrated outlet IDs are tailored to Berlin.

**License** MIT + file LICENSE

**URL** <https://github.com/KWB-R/kwb.infoworks>

**BugReports** <https://github.com/KWB-R/kwb.infoworks/issues>

**Imports** magrittr

**Suggests** covr, knitr, kwb.nextcloud, rmarkdown

**Remotes** github::kwb-r/kwb.nextcloud

**VignetteBuilder** knitr

**Encoding** UTF-8

**LazyData** true

**Roxygen** list(markdown = TRUE)

**RoxygenNote** 7.1.1

**Depends** R (>= 2.10)

**Repository** <https://kwb-r.r-universe.dev>

**RemoteUrl** <https://github.com/KWB-R/kwb.infoworks>

**RemoteRef** HEAD

**RemoteSha** 6138b91e062f8c941ccba332cb9bf5a47bbec8ad

## Contents

load_infoworks_output . . . . .	2
<b>Index</b>	<b>3</b>

---

load\_infoworks\_output *Load the Infoworks Output file (csv)*

---

**Description**

The function looks up all files in the specified infoWorks output folder. It chooses csv files that start with "link" and contain "ds" for downstream and the specified simulation name. All parameter listed in the parameter conversion table are selected.

**Usage**

```
load_infoworks_output(iw_output_folder, simulation_name, pct)
```

**Arguments**

iw_output_folder	Folder with InfoWorks csv-output
simulation_name	Complete or unique part of the simulation name

**Value**

A list with all read csv Files
